

Ajax home security cameras

Professionally installed and supported by RAC Security

For the better

Home security doesn't stop at detection, it extends to seeing what's happening. Ajax security cameras deliver high-definition video surveillance, allowing you to see what's happening, when it matters most.

Built with privacy, performance and reliability in mind, Ajax cameras offer premium video protection without compromise, and can even be integrated into an Ajax alarm system.

Call us on 1300 360 504 to make an appointment with one of our licensed security consultants

Clear vision, day and night

Ajax cameras capture crisp, high-resolution footage to help you clearly see what's happening around your home. With advanced low-light and night-vision capabilities, your property stays protected even after dark.

- » High-definition video quality
- » Wide viewing angles for better coverage
- » Infrared night vision for 24/7 visibility

Intelligent monitoring with AI recognition

Ajax security cameras use advanced AI to analyse video in real time, identifying and classifying people, vehicles and animals rather than simply recording motion. By focusing on meaningful activity and filtering out irrelevant movement, AI recognition:

- » Reduces false alerts
- » Captures important events
- » Makes reviewing footage faster and easier.

Designed for security and privacy

Ajax cameras are built with cybersecurity at their core. Encrypted data transmission and secure cloud infrastructure help protect your footage from unauthorised access, so your privacy stays yours.

- » Secure, encrypted video streaming
- » Controlled user access
- » Designed to meet modern privacy expectations

Flexible coverage for every home

Whether you're monitoring entry points, outdoor areas or internal spaces, Ajax cameras can be added where you need them most. Like all Ajax devices, they're modular, allowing your system to grow and adapt over time.

- » Indoor and outdoor camera options
- » Discreet, modern design
- » Easily expandable as your needs change

Future-proof security solutions

An Ajax system grows with you. We can add devices as your needs change - whether you're securing a new area, renovating, or simply upgrading your protection.

With RAC Security, your Ajax security cameras are professionally installed and backed by local support you can trust.
